

AirRest DC Lite Series

Category

Self Inflating Mats

- 75D soft polyester non slip top fabric reduces sleeping bag 'shimmy'.
- 75D ripstop polyester is used on the bottom layer for durability.
- Open cell inner foam expands rapidly to original size for self inflation.
- Large intake valve allows for better air flow for inflation/ deflation.
- The foam is heat bonded to the shell fabric for longterm durability.
- Seams are electro frequency welded (EFW).
- We use '**million holes**' die cut to remove foam but not loft resulting in a lighter and more compact pack size.
- Stuff sack is included.
- Repair kit includes a patch, adhesive glue, replacement valve cap and O ring.
